

# INSPYRE DOMAIN NAME SERVICES

## MANAGED SERVICES THAT HELP YOU SECURE YOUR DOMAIN NAME AND PROTECT YOU FROM LOSING IT

Inspyre offers a menu of domain name services tailored to suit your organization's needs. Whether you need to register a domain name or simply use our DNS servers to point the domain name elsewhere, we can help to make the process simple, painless, and hands-free so you can focus on more important things.

### DOMAIN NAMES – WHAT ARE THEY?

For our use, domain names are unique names that identify a website and related services. Domain names can be used to point to web servers, e-mail servers, and other services on a network or the Internet. Examples of domain names include google.com, yahoo.com, meettheneed.org, etc.

In order to use a domain name, you must register it with an accredited registrar. Popular registrars include Network Solutions, GoDaddy, and Tucows. Inspyre is a registered reseller for Enom, a world-class registrar offering reliable services to thousands of domain names in our portfolio.

Registering your domain name is just the beginning. After registration, you must update multiple settings, such as your DNS servers to enable the domain to work with the hosting company you choose. In addition, you must be attentive to any correspondence your registrar sends you to insure that you will not lose your domain name due to non-renewal or domain name disputes. Inspyre makes it easy for you by handling all of those background tasks by including them in our managed domain name services.

### OUR DOMAIN NAME SERVICES

Inspyre offers various domain name services designed to give you the right options for your specific situation. The services that we offer are as follows:

#### *Domain Name Registration: \$24.00 per year*

Let us register your domain name for you for just \$24 per year. Our managed service handles all of DNS record management, registered contact management, and annual renewals automatically. We work hard to make sure that you never even come close to losing your domain name. In addition, our trained staff of technicians can help to configure advanced DNS settings including multiple MX records, A Name management, CNAME redirections, and much more.

Domain Name Services

### *DNS Settings Updates: FREE / \$25 one-time*

Do you already own a domain name through another registrar? Inspyre can help you to update your DNS settings and point your domains to our services. Our DNS Settings Update service comes in two flavors – self-service and managed. By choosing self-service options for your DNS updates, a request is sent to our team for detailed instructions designed to help you to do the updates yourself. Our managed service takes the hassle out of your hands and places the task of updating your domain DNS settings in the hands of our experienced staff.

- Self-Service DNS Update Service: FREE
- Manage DNS Update Service: \$25 one-time

### *Domain Name Transfer: \$50 one-time, \$24 per year*

Would you like to consolidate your bills and move your domain name to our domain name portfolio? Inspyre will help you to transfer your domain name from your current registrar into our registrar account, allowing you to deal with just one company for all your technology needs. Never again will you miss a renewal date, or deal with the struggle of multiple IT companies. Our service includes a one-time transfer fee and an annual domain name renewal fee.

### *Domain Pointers / Domain Parking: \$15 per year*

Do you have domain names that you simply want to point to an existing Inspyre service you have under a different domain name? Through our Domain Pointer / Domain Parking service, we can simply redirect those domains to your existing services, providing you with multiple access points to your published web, email, or communication servers.

## ANNUAL RENEWALS

Inspyre automatically renews your domain names on an annual basis and bills your payment method on file for the renewal fee. Although the annual fee is nonrefundable, you may cancel your domain name at any time during that year.

---

## DNS MANAGEMENT

Our team will manage all DNS settings for your domain. Whether you need to point to web servers in our data center or data servers in your own facility, Inspyre's IT support team can handle most DNS requests within 24 hours or less. We understand how important your organization's activities are, and we want to be responsive to your most pressing needs.
