

NETMINISTRY MEMBERSHIP BENEFITS

ENJOY THE LUXURY OF HAVING A CENTRALIZED TECHNOLOGY DIVISION FOR YOUR ORGANIZATION

The vision of NetMinistry was to create a centralized team that would handle every technology need of a church, ministry, or Christian business. Our company has now served over 3,000 clients worldwide with everything from website design services to custom dedicated web servers and enterprise-level collaboration tools. It is a unique blend of pre-built technology combined with real world consulting and customized services.

BENEFIT #1: A COMPLETE WEBSITE SOLUTION

Unlike many other services, NetMinistry provides its clients with the most complete website solution possible. It combines tier one hosting with a suite of website applications that you can customize and add to your websites. The platform, powered by the Inspyre CMS, provides you with the ability to do the most basic tasks (like update webpage content) while allowing you to plug into more advanced technology (like running an online store, blogging, and running message boards). We never charge you more than your monthly membership fee to utilize these features since they are already part of our basic platform. Best of all, we provide documentation, free online support, and live training sessions (for \$35 per 30-minute session).

Many organizations do not utilize every feature of our system. But, any one of the features alone would cost more per month than the membership fee we charge. NetMinistry truly provides the best of content management, e-commerce management, and relationship management available anywhere!

BENEFIT #2: UNLIMITED ONLINE SUPPORT

All NetMinistry members enjoy the power and flexibility of communicating directly with our staff using our streamlined Inspyre Messaging System. This system bypasses the SPAM filters and organizes communication between you and our team. When you send a message through the Inspyre Messaging System, it is literally posted on the desktop of our internal communication system and routed to the appropriate team member. Most support requests are handled within 15-30 minutes of submission during our business day. Night request are handled as the first order of business the very next business day.

For emergency issues, such as outages, we make our emergency after-hours e-mail address available for free. This insures that your organization will always have someone to communicate with in the event of a system failure or website outage.

BENEFIT #3: WORLD-CLASS HOSTING ENVIRONMENT

We don't pack your web server with thousands of clients all pulling from the same resources. We limit our server environment to a low number that allows us to "overkill" the resources needed to deliver fast, reliable service. Our

servers are hosted in our tier one data center with multiple points of redundancy, not someone's closet with a broadband connection. All of our services are closely monitored to insure optimal performance and the ultimate in network reliability. Lastly, we own our own network and servers – we don't host with some third-party provider. This means that when there is a problem, we are directly responsible and fully capable of fixing it. What else can you ask for?

BENEFIT #4: A MENU OF E-MAIL SERVICE OPTIONS

For all NetMinistry clients, e-mail forwarding comes with every account. However, it is important to note that Inspyre offers an entire menu of e-mail service options, including POP e-mail, dedicated e-mail servers, and Microsoft Exchange hosting (shared and dedicated). If you are looking for more advanced e-mail sending capabilities, calendar sharing, or online collaboration, we can provide you with a customized solution to meet the needs of your growing organization. As your staff size increases and your initiatives take off, our desire is to help you to grow the capabilities and reliability of your team communication. We are positioned to do just that.

BENEFIT #5: COLLECTIVE EXPERTISE AND RESOURCES

Our expertise comes from decades of combined IT and web development experience. Our full service offering, listed at <http://www.inspyre.com>, spans across multiple technological disciplines and a broad range of skill sets. By being a NetMinistry member, you already know the people who can help you with almost any network-related issue or need you may have. From online collaboration tools to web hosting, Inspyre stands ready to serve you and expand our current relationship.
